

 T-Mini – A unique choice for start-up operations

Printed with the aeoon Compact Series on cotton

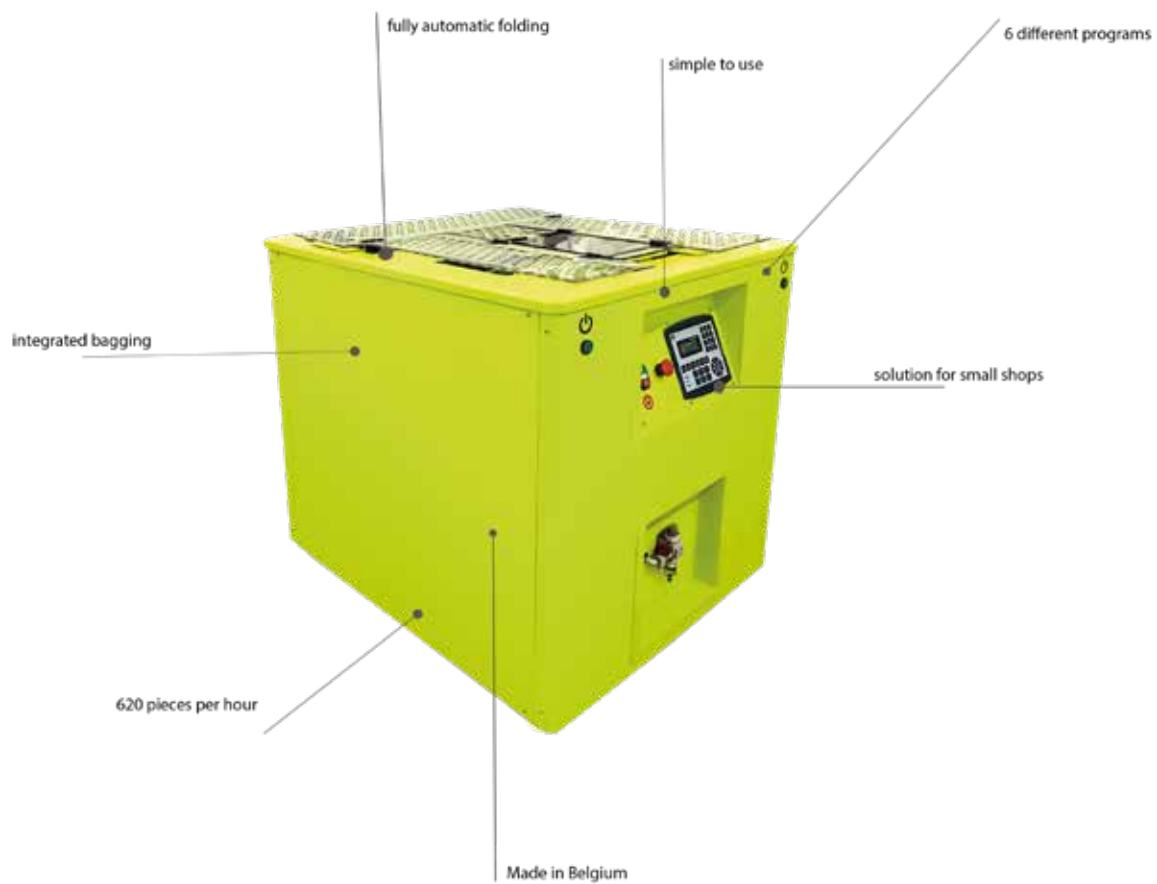

T-Mini – A unique solution

The T-Mini has shown to be the best solution for start-ups or enterprises that are in need of a folding machine that fits perfectly in their small shop. Equip this unique solution with additional labeling options or a conveyor belt to bring your production workflow to the next level. With an output of 620 pieces per hour the T-Mini can cope with e.g. just-in-time orders.

- Folding dimensions: 20 cm / 7.8'' (S), 25 cm / 9.8'' (M), 34 cm / 13.4'' (L)
- Standard bad size: 30 x 27 cm, 3 cm flap / 11.8 x 10.8'', 1.16'' flap
- Air consumption: 100l/min
- Power consumption: 0,6 kWh
- Power: 0,7 kW
- Current: 3,2 A
- Dimensions (packaged | l x w x h): 154 x 114 x 121 cm / 60.63 x 44.9 x 47.65''
- Net weight: 230 kg
- Conveyor: 150 and 254 cm / 59 and 100''

Feature overview

••••• Welcome to the aeoon family

aeoon Technologies is based in Tyrol, Austria. Here, we design and manufacture our digital textile printers. All departments contribute to our research and development. But we are not only working on new machines. We are constantly fine-tuning our current machines, adding new software features, testing new inks, fluids and materials and try to solve all kinds of obstacles our customers may encounter in their daily businesses.

Our philosophy

Our DTG printers have been developed and designed for the needs of the industrial mass production market. If you want to print fast and with amazing quality, these will be the right printers for you.

We are extremely flexible and can adjust our printer to your needs, e.g. amount of heads, axes, custom pallets, profit from our free software upgrades or let us help you with online shop integration.

Our ink is optimized for an industrial scale textile production and fulfils the highest quality demands on the biggest colour range in the market of CMYK, colour brightness and washability. The inks are water-based, meet the highest standards and are environmentally friendly and can be certified with Oeko-Tex and GOTS.

With the installation of every machine, one of our technicians will give you a training on how to operate the equipment to facilitate your path towards a better understanding of the printer. In addition, we offer regular trainings for our customers, technicians and resellers.

In case of questions or problems, our dedicated support will do their utmost to help you.
